

The Adobe Photoshop templates you downloaded are a guide for preparation of print layout for **Flipmode FAW002** wall panel system. These template can be used for example for dividing a photograph appropriately between acoustic boards in a Flipmode panel set as these templates are made to appropriate dimensions with appropriate spacing between panels and preview tools for evaluating printed and visible areas.

These templates are NOT intended as a delivery format for print artwork, unless otherwise agreed upon with your Flipmode supplier. Additional charges may apply if print material is delivered in a format not specified in the print artwork guide.

Follow print artwork guide for preparation of final print material. Print artwork guide is included in the same package s the template.

Adobe Photoshop templates are available for sets of 1 to 12 units.

Adobe InDesign Template for corresponding number of panels (Due to limitations in InDesign templates are available for sets up to 10 panels. InDesign template fo a single panel delivered with templates for sets with more than 10 panels.) and PDF export preset are included inte package as well. These can be used to prepare the final printable artwork created with this template.

You can either place an image created with this template as a whole (up to 10 panel set) into the InDesign template or export each panel individually (required for sets of more than 10 panels) and place them into the template. Make sure to export the whole PRINTED AREA instead of visible area when exporting artwork.

Template information:

Template resolution: 125 pixels/inch
